

Residents of Prairie Village seek answers to the following questions:

1. What are the **goals and anticipated outcomes** for changing a zoning process that has worked for many years?
2. What is the **definition of success** if a zoning change should be made?
3. Did the city conduct a **thorough review** of where these proposed changes are legal? If so, where is that documentation? If not, why not?
4. Did the city council obtain **legal advice** on the recommended zoning changes before it was unanimously approved to send it to PC for “implementation”? If so, please share the findings and where they are published as part of the minutes/discussion?
5. Have the council members **met with residents** in their respective Wards to seek formal feedback? If so, where is this information? If not, why not?
6. Median income determination...why weren't the Prairie Village AMI figures used in Village Vision vs the **KC Metro Median Income?**
PV AMI=\$88,200
KC Metro=\$73,900
Kansas City, MO=\$63,400
Kansas City, KS=\$53,900
(source: <https://censusreporter.org/>)
7. The Ad hoc committee assumed there is a shortage of housing for a specified group of individuals. **What sources were used** to come to this conclusion?
8. Assuming the objective is to increase diversity in Prairie Village (Disclaimer—Is that one of the objectives?) **How would the city control who moves in** by race, religion and how much developers will charge?
9. **“By right”** is a clause that removes the opportunity for citizen input in development. How does this increase property owners' rights?
